LAKSHMIKANTH PITHANI

Lead Full Stack Engineer | React · Next.js · TypeScript · Node.js · AWS Serverless · Agentic AI
ilakshmikanthp@gmail.com | linkedin.com/in/ilakshmikanthp | Hyderabad, India

SUMMARY

- Lead Full Stack Engineer with 17+ years in software engineering, including 10+ years building consumer-facing, cloud-native web products with React, Next.js, TypeScript, Node.js and AWS Serverless, after an earlier career in embedded and industrial IoT systems.
- Ships user-facing products for EA, Walmart, GAP and Advance Auto Parts: micro-frontend architectures, reusable design systems, passwordless authentication, and performance- and experiment-driven e-commerce (A/B-tested pricing, Lighthouse benchmarking).
- Owns work end to end: API contracts, serverless backends, CI/CD, monitoring, and root-cause analysis in production.
- Applies agentic AI to engineering: spec-driven development with MCP (Figma + Jira), LLM APIs, and multi-agent systems (Google ADK hackathon).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Node.js, Python

Frontend: React, Next.js, Micro-Frontends, Storybook, Atomic Design / design systems, Vue.js, HTML5, CSS3, web performance (Lighthouse)

Backend & APIs: Node.js, AWS Lambda, Serverless Framework, REST API design, Swagger / OpenAPI, passwordless authentication, microservices, Moleculer.js, TypeORM

Data: PostgreSQL, MongoDB, Redis, MySQL

Cloud & DevOps: AWS (Lambda, S3, CloudWatch), Docker, Kubernetes / Rancher, Terraform, Jenkins, Bamboo, CI/CD, monorepo (pnpm / Turbo)

Observability & Quality: New Relic, AWS CloudWatch, Jest, TDD, SonarQube, code reviews, A/B testing

AI & Agentic: LLM APIs, Model Context Protocol (MCP), Google ADK, multi-agent systems, AI-assisted spec-driven development (SDD)

PROFESSIONAL EXPERIENCE

Lead Full Stack Engineer | Maantic Technologies (Client: Electronic Arts) Feb 2024 – Present
EA FanCare Help Center & Passwordless Authentication: self-service support for players (refunds, connectivity, penalties, beta codes, missing content)

- Build the FanCare Help Center on a React / Next.js micro-frontend architecture with independently deployable modules for article discovery, search and case management; supported the July 2025 launch.
- Created reusable TypeScript component libraries and shared packages in a pnpm / Turbo monorepo, keeping UX consistent and speeding delivery across multiple applications.
- Designed serverless APIs on AWS Lambda (Serverless Framework) for passwordless authentication, user lifecycle and support workflows.
- Drive an agentic, prompt-based spec-driven development workflow that connects Figma and Jira through MCP to automate development, test-case generation and change delivery.
- Protect quality with Jest unit and integration tests and code reviews; run root-cause analysis and CloudWatch monitoring with Product and QA in Agile cycles.
- **Platform context:** Next.js shell with S3-hosted micro-frontends, Java / Spring Boot BFFs and AWS Lambda on EKS, Redis, OpenSearch, Contentful, GitLab + ArgoCD GitOps, OpenTelemetry.

Principal Developer | Advance Auto Parts Jun 2022 – Nov 2023
E-commerce platform modernization

- Led the migration of the e-commerce platform from a JSP monolith to React and Next.js; presented the Next.js proof of concept that shaped the stack decision.
- Shipped A/B-tested pricing capabilities and integrated OneTrust privacy for compliance.
- Automated New Relic alerting with Terraform and managed Jenkins pipelines, improving release efficiency and reducing manual errors.
- Resolved critical production issues, optimized data migration and managed IBM WebSphere eSpot configuration; partnered with UX, analytics, QA and business teams on responsive UIs.

Technical Lead | Nisum Consulting (Clients: Walmart & GAP) Mar 2021 – Jun 2022
hayneedle.com re-platform and GAP checkout micro-frontend

- Led the end-to-end re-platform of hayneedle.com (React, Bulma) to improve performance and user engagement.

- Introduced Storybook, Atomic Design and mobile-first standards, creating a reusable design system.
- Built GAP checkout as a micro-frontend and integrated Rockerbox analytics through Google Tag Manager.
- Raised code quality with linting, Prettier and SonarQube; streamlined CI/CD with Bamboo and Rancher, benchmarking with Lighthouse.

Lead Software Engineer | Zen3 / Tech Mahindra Aug 2019 – Feb 2021

Scalable web and microservices platform

- Designed CRUD microservices with Moleculer.js, TypeORM and PostgreSQL; deployed Node.js services as Docker containers on AWS with Redis.
- Introduced Swagger API documentation and contributed to architecture discussions and reusable component design.
- Built Vue.js (Vuex, Vuetify) frontends and d3.js KPI dashboards.

Technical Manager | EIM Solutions Pvt. Ltd. Nov 2015 – Jul 2019

Enterprise web applications and operational dashboards for global clients

- Built React.js / Node.js single-page applications (ES6, MongoDB / MySQL) with REST APIs; led project execution and international deployments, including remote training in Nigeria.
- Delivered operational dashboards and implemented MQTT-based real-time communication for IoT use cases.

Earlier Career 2008 – 2015

- System Programmer / Asst. Manager, Sunlux Technologies (2010 – 2015): built industrial communication and monitoring systems (Modbus RTU, embedded Linux); integrated with BMS platforms across India and the Dubai Metro, and commissioned monitoring at ISRO GPS satellite stations.
- Web Developer, Golive Gaming Solution (2008 – 2010): built core modules (login, admin, community, blogs, events, games) for a gaming web platform.

EDUCATION & TRAINING

- B.Tech, Electrical & Electronics Engineering, Vignan Institute of Information Technology, JNTU, India (2003 – 2007).
- Advanced Diploma in Real-Time Embedded Systems and Linux Device Drivers, Cranes Varsity, Bangalore.
- Multi-Agent Systems: Google ADK Hackathon and related AI hackathons.

AWARDS

- Contributed to the successful launch of the EA FanCare Help Center (2025).
- Best Employee Award: Zen3 (2019) and EIM Technologies, for outstanding technical contributions.
